

PRECIZION™ GHK-CU PEPTIDE

Professional Distributor & Clinic Partner Package

A clinical-grade regenerative skin support cream developed for advanced aesthetic medicine, post-procedure recovery, and daily skin renewal. PRECIZION™ GHK-CU Peptide Cream combines advanced copper peptide technology with deeply nourishing and barrier-supportive ingredients to help improve skin quality, hydration, firmness, and recovery.

WHY CLIENTS LOVE IT

PRECIZION™ Copper Repair Cream was formulated to support skin that is dry, aging, inflamed, compromised, dehydrated, or recovering from advanced procedures. Ideal after PDO Threads, injectables, microneedling, RF treatments, laser procedures, peels, and advanced facials. Clients report skin that feels more hydrated, calmer, stronger, smoother, healthier, and more resilient.

HERO INGREDIENTS

GHK-CU Copper Peptide Complex – 0.5%

Supports collagen and elastin production, improves firmness, texture, skin resilience, and visible recovery.

Hyaluronic Acid

Provides deep hydration support and improves moisture retention and skin plumpness.

Mango & Shea Butter

Supports barrier repair, nourishment, and long-lasting hydration.

Aloe & Cucumber

Helps calm irritated or post-procedure skin while reducing visible redness.

Vitamin E

Provides antioxidant support and helps defend against environmental stressors.

POSITIONING FOR YOUR CLINIC

PRECIZION™ is more than a moisturizer — it is a regenerative support cream positioned for modern aesthetic practices. Perfect as: Post-procedure recovery support Luxury retail skincare Daily regenerative moisturizer Take-home treatment enhancement product Bundled procedure package addition.
